

A close-up photograph of a brick wall. The bricks are reddish-brown and arranged in a standard running bond pattern. A large, dark shadow is cast across the wall, starting from the left and moving towards the right, partially obscuring the bricks. The lighting is dramatic, highlighting the texture of the bricks and the grain of the shadow.

Art engages, inspires and  
challenges pupils, equipping  
them with the knowledge and  
skills to experiment and invent.

Art is an important part of developing pupils' ability to express their individual creativity, working both individually and collaboratively with others.

Art takes pupils to other worlds, cultures and times, as they explore ideas in the work of a variety of artists.

Through art, pupils produce their own, original creative work, exploring their ideas and recording their experiences.

Learning through art develops pupils' language skills, social skills, decision-making and risk-taking.
